## Maximum Insulating Glass Sizes

Special adjustments can sometimes be made if you require product outside of these dimensions. Contact us with the requirements of your project.

Glass Thickness (mm)	ANNEALED GLASS		TEMPERED (HEAT TREATED) GLASS		
	Maximum Long Dimension (in.)	Maximum Area (ft <sup>2</sup> )	Maximum Short Dimension (in.)	Maximum Long Dimension (in.)	Maximum Area (ft <sup>2</sup> )
2.2	70	10		70	15
3.0	81	18	36	81	22
3.9	91	28	48	91	31
4.7	100	36	60	100	41
5.7	120	51	83 1/2	143 1/2	61

1. Limits shown do not apply to shapes or units fabricated with mismatched glass thickness.
2. Maximum area based on maximum sizes and dimensions that can typically be produced (not a windload specification/requirement)
3. Size limits and maximum dimensions are applicable to 2-pane & 3-pane IG units, and monolithic annealed and tempered glass.
